

TECHNICAL Data

VEHICLE PRESOAK

DESCRIPTION: An alkaline, red-colored liquid ideally suited for pre-spraying vehicles before entering car washes. Its detergent builders, emulsifiers and surfactants are thus given a chance to effectively loosen hard-to-remove soil and film for easier and more effective cleaning and degreasing.

DIRECTIONS: Dilute product with 150 to 250 parts of warm water. Amounts used will depend on car wash application and amount of soil. Cover the vehicle with the solution. Do not allow it to dry on the surface.

FOR COMMERCIAL USE
