

## LIQUID BIO CLEANSER

**DESCRIPTION:** Liquid Bio Cleanser is a viscous, high-foaming industrial degreaser that rapidly penetrates and emulsifies grease, oil and drilling mud. It is a fully biodegradable, methyl ester-based emulsifying detergent that is derived from sustainable vegetable oil origins. It is non-corrosive, non-combustible and unregulated for transport. Liquid Bio Cleanser is a versatile degreaser that can be used straight to maximize clinging to a vertical surface, can be diluted 1:1 with water for use with foaming applicators or can be further diluted up to 1:50 for light duty cleaning and degreasing. This low odour degreaser is formulated with superb de-oiling surfactants for removal of the toughest hydrocarbon soils and a package of wetting agents that provide excellent rinsability. Liquid Bio Cleanser is an environmentally responsible product designed with worker's safety in mind.

### **DIRECTIONS:**

Remove excess grease and soil. Apply Liquid Bio Cleanser using a nylon brush, rag, spray bottle or foamer. Allow sufficient contact time for maximum efficacy. Scrub the area to be cleaned. Best results are obtained when rinsing with steam or hot water using a power washer.

### **USE LIQUID BIO CLEANSER WITH A FOAMER:**

Dilute Liquid Bio Cleanser 1:1 with cool water. Add Liquid Bio Cleanser to the water slowly with constant stirring until solution is clear. Apply Liquid Bio Cleanser with the foamer.

### **GENERAL DUTY CLEANING AND DEGREASING:**

Liquid Bio Cleanser can be diluted in cool water to any desired concentration.

For light duty cleaning of mechanics tools and workstations, dilute Liquid Bio Cleanser up to 1:50.

For moderate to heavy duty degreasing applications, dilute Liquid Bio Cleanser 1:2 to 1:10

**FOR COMMERCIAL USE**
