

BioCling

DESCRIPTION: BioCling is a highly powerful concentrate for maintaining free flowing drains and sewer lines. This thick bodied formula contains a blend of selected micro-organisms and enzymes that clings to drain pipe walls and provide excellent breakdown and reduction of organic waste build up.

BioCling utilizes the digestive abilities of naturally occurring bacteria to break down organic waste (i.e. Starches, carbohydrates, cellulose, fats and oils) as well as pop syrup. It is bio degradable and natural solution for a broad spectrum of organic material, stain and odour problems.

Please consult Halabi Chemicals regarding the various applications of this product.
