

LIQUID VEGETATION PURGE

DESCRIPTION: LIQUID VEGETATION PURGE is a concentrated, commercial strength cleaner specially formulated for killing and removing lichen, mold, algae and moss from roofs and decks. It is a non-foaming quaternary amine surfactant-based cleaner that can be used on most surfaces to kill invasive vegetation. It is an environmentally responsible, phosphate-free detergent that leaves surfaces clean and free of destructive vegetation.

DIRECTIONS: Dilute 1 litre of LIQUID VEGETATION PURGE in 5 litres of water. 1 litre of concentrate will effectively treat 20m² (215ft²). Apply the solution liberally with a sprayer or mop. It may be left on the surface to be washed away with rain water or rinsed off after at least 30 minutes contact time. Invading vegetation will begin to die immediately after treatment but will require time to dry up and fall off. For stubborn vegetation, repeat the procedure as needed.

FOR COMMERCIAL USE
