Grease Trap Treatment Program

Halabi Chemicals Grease Trap Treatment program outlines the details of our proven system of treating the grease in your grease traps. By using Halabi Chemicals Liquid BioPurge Concentrate positive results in your grease trap are almost guaranteed.

Halabi Chemicals Grease Trap Treatment Program Details:

1) The Liquid – Liquid BioPurge Concentrate

Liquid BioPurge Concentrate is what our grease trap treatment revolves around. This special formulation of bacteria has one job – to eat grease! This highly concentrated blend of bacteria are specially designed to eat grease and eliminate the odor associated with it.

When Liquid BioPurge Concentrate is in a grease rich environment what it does is feast on fats, oils and grease – otherwise known as FOG. It eats this FOG and only leaves behind water and carbon dioxide!

2) The Pump

The method we use to inject Liquid BioPurge Concentrate into your grease trap is through an automatic pump system. This pump is mounted on top of the pail and is programmed to pump in the desired amount of Liquid BioPurge Concentrate during low load periods (or even while you're sleeping!). During these times it works on eliminating the Fat, Oils and Grease produced during your busy hours of the day.

3) The Powder – BioPurge Powder

Used alongside our Liquid BioPurge Concentrate, our BioPurge Powder is used to combat any harsh soaps and detergents which may find themselves into your grease trap. The powder is to be added periodically down a drain leading into your grease trap (usually once a week).

Cost Analysis

The below costs are an estimate based on an average grease trap size:

| Item | Retail Cost | Your Cost |
|----------------------------------|--------------------|---------------------|
| Automatic Pail Mounted Pump | \$750 + GST | No Charge / On Loan |
| Approximate Powder Used | \$300 + GST / year | No Charge |
| Batteries changed every 6 months | \$50 + GST / year | No Charge |
| Liquid BioPurge Concentrate | \$325 + GST / pail | \$325 + GST / pail |

Average sized grease traps will require 5-7 pails per year.

All pump repairs, service and/or replacements necessary are done at the expense of Halabi Chemicals. All you pay for is the Liquid BioPurge Concentrate, there are **absolutely no hidden costs** associated with our program.

The Benefits of Halabi Chemicals Grease Trap Treatment

- No more paying someone to haul your grease away and then dump that grease into our environment. This procedure is noisy and messy one. The procedure can also cause an unwanted disruption in the day-to-day operations of your business.
- No more harmful odours! The odour emitted from your grease trap is not only filthy smelling, it is also a sickness causing agent. No more will you have to expose your employees and customers to this vile and illness inducing stench.
- The water leaving your grease trap will be rich in bacteria. It will help keep your sewer lines from backing up and will continue on to clean city lines as it leaves your facility.
- Environmentally friendly – you can feel good knowing that you are treating your own waste on your own site in a green way and doing your part to help protect our environment.
