## SEAMLESS

This product is a ready-to-use concrete and masonry sealant. Seamless has the latest technology in concrete and masonry protection, fortifying against UV light and physical weathering which can cause cracking. Seamless binds below the surface which allows the material to breathe by letting water out, but not in. The appearance of the surface will not be altered.

**DIRECTIONS:** This product is ready-to-use and should be sprayed directly onto the surface to be protected. For best results, apply two coats. Allow time for the first coat to dry before applying the second.

FOR COMMERCIAL USE
