

EXCEL DC PLUS

EXCEL DC PLUS is an industrial grade descaler formulated to remove hardened mineral scale deposits that cannot be removed with lighter duty descalers. It is an inhibited acid blend that will rapidly penetrate scale and dissolve it for easy removal.

DIRECTIONS:

Add EXCEL DC PLUS to water at a ratio of 1:20 – 1:10 for removal of stubborn mineral scale deposits.

EXCEL DC PLUS is best applied liberally with a mop. As mineral scale dissolves, CO₂ gas bubbles will be liberated. Remove excess EXCEL DC PLUS with a squeegee and mop up or hose off residue using fresh water. Do not leave EXCEL DC PLUS on ceramic tile and grout for prolonged periods.

CAUTION: EXCEL DC PLUS contains Hydrochloric Acid. Do not breathe vapour or fumes. Wear appropriate Personal Protective Equipment to eliminate contact with the skin and eyes.

FOR COMMERCIAL USE
