## BIOPURGE BLUE

This is an excellent non toxic, formaldehyde-free R.V., marine, airplane and bus holding tank deodorizer. It is a biologically active liquid formulated with a blend of selected micro organisms and enzymes. Its digestive enzymes are environmentally safe and biodegradable while providing excellent breakdown of organic waste and eliminating odours. This product can also be used for applications such as waste degrading in septic tanks and controlling odours and digesting waste in outhouses and portable toilets.

### **DIRECTIONS:**

**R.V. Holding Tanks:** Add 60-90 ml (2 to 3 ounces) per 45 litres (10 gallons) of water in holding tank.

**Septic Tanks:** Use 500 ml per week for every 1000 gallons.

**Portable Toilets and Outhouses:** Use as required to control odours and to break down waste.

**Airplane, Marine and Bus Holding Tanks:** Use as required to meet specific needs.

Avoid eye contact and excessive inhalation. Wash hands with warm soapy water after handling.

FOR COMMERCIAL USE
