

BREEZE EASE DEODORIZER

DESCRIPTION: This product is a liquid deodorizer formulated to chemically neutralize odours rather than using a sanitizer or just masking the problems with perfume. Unlike other air fresheners, the active ingredient in BREEZE EASE DEODORIZER chemically attacks smelly acids, amines, mercaptans, thioesters and ammonia – the common odour-causing agents in sweat, urine, decaying organic matter and cigarette smoke. The neutralization reaction is swift and permanent. The light Breeze Ease scent left behind is very pleasant and not overwhelming.

DIRECTIONS:

Breeze Ease Deodorizer is a concentrated liquid product that is safe to use on most surfaces. It may be applied directly as a liquid or misted for maximum surface area contact. This product may be used as is or diluted with up to 10 parts of water. The extent of dilution will depend on the application, the degree of malodor and personal preference.
