

TECHNICAL Data

STAIN GONE

A unique blend of water soluble solvents and neutralizers designed to dissolve and remove a broad range of both oil and water based stains. This product will soften and emulsify oil, grease, fat and tar. It has properties that enable it to remove coffee, food and other organic stains.

This spotter contains a neutralizer that removes iodine stains quickly and completely.

The product has a neutral pH and is safe to use on stain resistant carpets.

DIRECTIONS: Vacuum carpet thoroughly, remove all loose soil, scrape away any encrusted material with a blunt scraper. Apply spotter at full strength. Do not use excessive amounts of spotter. Several small treatments are better than one excessive treatment. It is important to allow sufficient contact time (5-10 minutes) as the pre-spotter requires time to work.

FOR COMMERCIAL USE
