

## DRY FOAM CARPET SHAMPOO

This product is a completely soluble, stable and highly effective detergent for dry-foam cleaning carpets and upholstery fabrics. It is formulated for use with a carpet shampoo applicator, a floor machine with bonnet pad or for manual use.

**DIRECTIONS:** Thoroughly vacuum carpet before applying liquid carpet shampoo. Use a solution of 1 part product to 10 parts of water.

Apply shampoo with an applicator machine or spray on dampened carpet with a hand sprayer. Use the shampoo machine or a floor machine with a bonnet pad to agitate the shampoo and produce the dry foam. The agitation will lift dirt, grease and soil from the carpet and hold it in the foam. Allow foam to dry and pick up soil and residue with a vacuum.
