

CLT-200 CLOSED LOOP TREATMENT

DESCRIPTION: A concentrated balanced compound, for treatment of hot water boilers, closed systems and chilled water re-circulating systems. It is ideally suited for food plants and other industrial use. This product is a blend of phosphates and organo phosphonates, alkali, water softeners, and sodium sulphite to protect steel, copper, brass and multi-metal systems.

DIRECTIONS: Estimate the amount of water in boiler. Add 1 part of CLT-200 to each 400 to 500 gallons of water in the system.

SPECIFICATIONS:

- Phosphate (PO_4) should be in the range of 30-50 ppm.

When used in chilled re-circulating systems, it is recommended to also use a biocide or algicide.

The Canadian Food Inspection Agency has no objection to the use of this product in food plants when used according to label directions.
