

CLT-230

DESCRIPTION: CLT-230 is a concentrated balanced compound, for treatment of hot water boilers, closed loops and chilled water re-circulating systems. This product is a blend of organo phosphonates, alkali and other corrosion and scale inhibitors.

DIRECTIONS: Estimate the amount of water in boiler. Add 1 part of CLT-230 to each 400 to 500 gallons of water in the system.

SPECIFICATIONS:

- Phosphate (PO₄) should be in the range of 30-50 ppm.

When used in chilled re-circulating systems, it is recommended to also use a biocide or algaecide.

The Agri-Food Safety Division, Agriculture Canada has no objection to the use of this product in food plants when used according to label directions.
