

B-10 BIOCIDES

USES:

- Cooling towers
- Humidification spray pans
- Crude oil storage tanks
- Fire water storage tanks
- Closed heating and cooling loops
- Water disposal wells
- Fuel storage tanks
- Produced water systems

GUARANTEE: 10% active Bronopol.

PROPERTIES OF BIOCIDES: Fast acting, non-ionic/non-foaming, broad spectrum anti-bacterial, effective at all pH's, non-toxic, readily biodegradable, odorless.

ADVANTAGES:

- Environmentally safe
- Effective against slime forming bacteria, including Legionella
- No evidence of bacterial resistance observed in over 30 years of use
- Compatible with many chemicals in water treatment
- Reduces slime and corrosion – increasing system efficiency

DIRECTIONS FOR USE

Introduce B-10 Biocide into the system at a convenient point via pot feeder, slug feeder or chemical injection pump. Shock feed 1 gallon per 1000 gallons of system volume to achieve 100 ppm product. This should be done 2 times per week to maintain proper control of bacteria growth in your system.

PCP #: 21153.18
