

TECHNICAL Data

SBT-440 STEAM BOILER TREATMENT

This product is a full strength chelating agent to control hardness and heavy metal ions in areas with poor water conditions. It is active in a wide pH range and stable at high temperatures.

DIRECTIONS:

In boiler systems, use product at 1 gallon per 350 gallons of make-up water to chelate 20 grains of CaCO₃ hardness.

The Canadian Food Inspection Agency has no objection to the use of this product in food plants when used according to label directions.

FOR COMMERCIAL USE
