

GT-850 GLYCOL TREATMENT

A propylene glycol anti-freeze and heat transfer fluid of exceptional low toxicity providing excellent corrosion protection by use of a blended inhibitor package.

It is a clear, colorless liquid with no odour that is easily mixed with water.

GT-850 GLYCOL TREATMENT is hygroscopic at low temperatures and as such will attract moisture from the surrounding atmosphere.

The inhibitor package in GT-850 GLYCOL TREATMENT has excellent thermal stability for bulk fluid temperatures up to 325°F and maximum film temperature of 375°F.

This product is also ideally suited for use as antifreeze in recreational vehicles at proper dilutions with water.

H-250 Non-Toxic Glycol/Water mixture:

% By Volume	Freezing Point °C
20%	-7
30%	-13
50%	-33
55%	-42
