

EFFortless

This product is an industrial strength acid cleaner formulated to dissolve efflorescence salts from the surface of tile, slate, terracotta, sandstone and other porous materials.

Directions:

Wet the surface to be cleaned with water before applying product. Dilute product 1:10 – 1:25, depending on the severity of the efflorescence. Scrub efflorescence with a scrub brush. Allow product to soak for 1 – 2 minutes MAXIMUM. As efflorescence salts are dissolved, bubbling may occur. Rinse area thoroughly with water. Repeat treatment as necessary. Neutralize rinse water with an alkaline solution if required.

Caution:

Spot test for material compatibility in an inconspicuous area before bulk use. This product is very acidic. Always wear appropriate Personal Protective Equipment when handling.

FOR COMMERCIAL USE
