

HOT TANK DEGREASER

An alkaline, non-foaming cleaner and degreaser ideally suited for use in re-circulating washers, high pressure cabinet washers and hot tanks.

This is a non-caustic, environmentally friendly product containing the citrus solvent d-limonene and highly effective rust inhibitors. It may be used by engine re-builders, transmission shops, mines and railroads for removal of carbon, oil, grease and other contaminants from a wide variety of metal surfaces.

DIRECTIONS: Remove excess grease prior to cleaning. Use at 1-5% concentration in hot water. Best results are achieved at 160-180°F (71-82 °C).

FOR COMMERCIAL USE
