

GRAFFITI B GONE

**** NEW & IMPROVED ****

DESCRIPTION: Graffiti B Gone is an industrial grade, solvent-based cleaner formulated for the effective removal of typical graffiti markings: spray paint, permanent marker, felt pens, ink pens, lipstick and crayons. This product contains a blend of solvents, foaming wetting agents and emulsifiers that rapidly penetrate and dissolve graffiti markings, making them easy to wash away. Graffiti B Gone is a safe, environmentally responsible alternative to the harsh solvents and caustic chemicals typically used to remove graffiti; it is 100% readily biodegradable, non-flammable and non-combustible, has low toxicity and a neutral pH. It is also effective for removal of black sole marks, sticky sap and other unwanted marks.

DIRECTIONS: Graffiti B Gone is ideally applied undiluted. It is semi-viscous to maximize contact time and vertical cling. It can be applied with a sprayer, sponge or roller. Allow 5 – 10 minutes of contact time without letting the product dry. Use a brush or rag to mechanically scrub the loosened substrate off. Rinse with hot water using a pressure washer if possible. For heavy staining, more than one application may be necessary.

CAUTIONS: Graffiti B Gone may remove paint or coatings other than unwanted graffiti. Always spot test before use. Use only in well ventilated areas.
