

EXCEL DC

EXCEL DC is a concentrated descaler formulated to remove the toughest mineral scale deposits from pool decks and pump rooms. It contains a low foaming surfactant to increase penetration and soil removal.

DIRECTIONS: Add EXCEL DC to water at a ratio of 1:50 for light duty cleaning to 1:20 for heavy duty cleaning.

EXCEL DC is best applied liberally with a mop. As mineral scale dissolves, CO₂ gas bubbles will be liberated. Remove excess EXCEL DC with a squeegee and mop up or hose off residue using fresh water.

CAUTION: EXCEL DC contains Hydrochloric Acid. Do not breathe vapour or fumes. Wear appropriate Personal Protective Equipment to eliminate contact with the skin and eyes.

FOR COMMERCIAL USE
