

TECHNICAL Data

FOAM BUSTER

DESCRIPTION: This product is specially formulated to prevent and eliminate excessive foam in various food plant, industrial and chemical processes. An effective defoamer will reduce pump cavitation, increase spray efficiency, reduce cleaning time and improve rinsing.

DIRECTIONS: It can be used in automatic scrubbers, rug steam machines, etc. at a rate of $\frac{1}{4}$ - $\frac{1}{2}$ oz/gallon (1.5 - 4 ml/L) in the recovery tank. For other uses, add defoamer as required. Amount needed will depend on tank size, type of agitation, chemical being used and type of water. All food contact surfaces should be thoroughly rinsed with potable water.

The Agri-Food Safety Division, Agriculture Canada has no objection to the use of this product in food plants when used according to label directions.

FOR FOOD PLANT & COMMERCIAL USE
