

TECHNICAL Data

MAGIC FOAM

DESCRIPTION: A heavy duty chlorinated alkaline product designed for use in food plants, poultry processing plants, dairies, rendering plants and many other applications.

It is best applied with a foam generator or low pressure foam sprayer. The foam created will cling to vertical surfaces and allow prolonged contact time for the product to soften and emulsify soil deposits.

DIRECTIONS: For effective degreasing and cleaning, use 1 part to 40 parts of water. For lighter degreasing and sanitizing, use a solution of 1 part to 100 parts of water to achieve 200 p.p.m. available chlorine. When used on food contact surfaces, rinse surface clean with potable water.

NOTE: Prolonged contact may harm painted surfaces.

The Canadian Food Inspection Agency has no objection to the use of this product in food plants when used according to label directions.

FOR COMMERCIAL USE
